Office of Inspector General

<https://oig.hhs.gov>

The mission of the Office of Inspector General (OIG), as mandated by Public Law 95-452, as amended, is to protect the integrity of the Department of Health and Human Services (HHS) programs, as well as the health and welfare of beneficiaries served by those programs. This statutory mission is carried out through a nationwide network of audits, investigations, and inspections conducted by the following operating components:

Office of Audit Services

The Office of Audit Services (OAS) provides auditing services for HHS, either by conducting audits with its own audit resources or by overseeing audit work done by others. Audits examine the performance of HHS programs and/or its grantees and contractors in carrying out their respective responsibilities and are intended to provide independent assessments of HHS programs and operations. These assessments help reduce waste, abuse, and mismanagement and promote economy and efficiency throughout HHS.

Office of Evaluation and Inspections

The Office of Evaluation and Inspections (OEI) conducts national evaluations to provide HHS, Congress, and the public with timely, useful, and reliable information on significant issues. These evaluations focus on preventing fraud, waste, or abuse and promoting economy, efficiency, and effectiveness of departmental programs. To promote impact, OEI reports also present practical recommendations for improving program operations.

Office of Investigations

The Office of Investigations (OI) conducts criminal, civil, and administrative investigations of fraud and misconduct related to HHS programs, operations, and beneficiaries. With investigators working in all 50 States and the District of Columbia, OI utilizes its resources by actively coordinating with the Department of Justice and other Federal, State, and local law enforcement authorities. The investigative efforts of OI often lead to criminal convictions, administrative sanctions, and/or civil monetary penalties.

Office of Counsel to the Inspector General

The Office of Counsel to the Inspector General (OCIG) provides general legal services to OIG, rendering advice and opinions on HHS programs and operations and providing all legal support for OIG's internal operations. OCIG represents OIG in all civil and administrative fraud and abuse cases involving HHS programs, including False Claims Act, program exclusion, and civil monetary penalty cases. In connection with these cases, OCIG also negotiates and monitors corporate integrity agreements. OCIG renders advisory opinions, issues compliance program guidance, publishes fraud alerts, and provides other guidance to the health care industry concerning the anti-kickback statute and other OIG enforcement authorities.

Notices

THIS REPORT IS AVAILABLE TO THE PUBLIC
at <https://oig.hhs.gov>

Section 8L of the Inspector General Act, 5 U.S.C. App., requires that OIG post its publicly available reports on the OIG Web site.

OFFICE OF AUDIT SERVICES FINDINGS AND OPINIONS

The designation of financial or management practices as questionable, a recommendation for the disallowance of costs incurred or claimed, and any other conclusions and recommendations in this report represent the findings and opinions of OAS. Authorized officials of the HHS operating divisions will make final determination on these matters.

EXECUTIVE SUMMARY

The Medicare contractor for Jurisdiction 9 overpaid providers by \$442,000 for selected outpatient drugs over 3 years.

WHY WE DID THIS REVIEW

The Centers for Medicare & Medicaid Services (CMS) pays Medicare claims through the Medicare administrative contractor or fiscal intermediary (Medicare contractor) in each Medicare jurisdiction. From July 1, 2009, through June 30, 2012, Medicare contractors nationwide paid hospitals \$11.5 billion for outpatient drugs, which also include biologicals and radiopharmaceuticals. Previous Office of Inspector General reviews of outpatient services have found that Medicare contractors overpaid providers for selected outpatient drugs. This report is part of a series of reports focusing on payments for selected outpatient drugs.

The objective of this review was to determine whether payments that the Medicare contractor for Jurisdiction 9 made to providers for selected outpatient drugs were correct.

BACKGROUND

Providers report the outpatient drugs administered to Medicare beneficiaries using standardized codes called Healthcare Common Procedure Coding System (HCPCS) codes and report units of service in multiples of the units shown in the HCPCS narrative description. Correct payments depend on accurate reporting of the HCPCS codes and units of service for each claim line item billed. CMS designed a series of automatic system edits that Medicare contractors use to review the units billed by providers, identify errors in billed amounts, and ensure that billed units that exceed the edit threshold for a likely dose are validated before the claim line items are paid. In this audit, we did not review entire claims; rather, we reviewed specific line items within the claims.

During our audit period (July 1, 2009, through June 30, 2012), First Coast Service Options, Inc. (First Coast), was the Medicare contractor for Jurisdiction 9 (Florida, Puerto Rico, and the U.S. Virgin Islands). However, we did not include in our review the U.S. Virgin Islands providers because they were not paid under the standard Medicare outpatient payment system. For Florida and Puerto Rico, the Medicare contractor paid providers \$560 million for 1.1 million line items for selected outpatient drugs. We reviewed 311 line items with total payments of \$1.9 million that were at risk for overpayment.

WHAT WE FOUND

Payments that the Medicare contractor for Jurisdiction 9 made to providers for 112 of the 311 line items for outpatient drugs we reviewed were not correct. These incorrect payments resulted in overpayments of \$445,245 and underpayments of \$3,291 that the providers had not identified, refunded, or adjusted by the beginning of our audit. Before our fieldwork, providers had refunded \$115,996 of overpayments for another 37 line items. The remaining 162 line items were correct.

For the 91 incorrect line items with overpayments of \$445,245 that had not been refunded, providers reported incorrect units of service, billed separately for an outpatient drug for which payment was packaged with the primary service, reported a combination of incorrect units of service and incorrect HCPCS codes, did not provide supporting documentation, and used incorrect HCPCS codes. For the 21 incorrect line items with underpayments of \$3,291 that had not been adjusted, we notified the providers of the underpayments so that they could submit adjustment claims.

Providers attributed the incorrect billings to clerical errors and to provider billing systems that could not prevent or detect the incorrect billing of outpatient drug services. The Medicare contractor overpaid these providers because there were insufficient edits in place to prevent or detect the overpayments.

WHAT WE RECOMMEND

We recommend that First Coast:

- recover the \$445,245 in identified overpayments,
- verify the payment of \$3,291 in identified underpayments, and
- use the results of this audit in its ongoing provider education activities.

FIRST COAST COMMENTS

In written comments on our draft report, First Coast mostly concurred with our recommendations and provided information on actions that it planned to take to address our recommendations.

INTRODUCTION

WHY WE DID THIS REVIEW

The Centers for Medicare & Medicaid Services (CMS) pays Medicare claims through the Medicare administrative contractor or fiscal intermediary (Medicare contractor)¹ in each Medicare jurisdiction. From July 1, 2009, through June 30, 2012, Medicare contractors nationwide paid hospitals \$11.5 billion for outpatient drugs, which also include biologicals and radiopharmaceuticals.²

Previous Office of Inspector General reports have found that Medicare contractors overpaid providers by more than \$122.4 million for outpatient drugs. We identified \$4.6 million of these overpayments in reviews of selected outpatient drugs at 39 providers and \$24.2 million in nationwide reviews of the drug Herceptin. We identified approximately \$81.9 million of payments for outpatient drugs in reviews of payments that exceeded provider charges by at least \$1,000, and identified approximately \$11.7 million of payments for outpatient drugs in reviews of payments at high risk for overpayments.³ (See Appendix A for a list of reports related to Jurisdiction 9.)

This report is part of a series of reports focusing on payments for selected outpatient drugs.

OBJECTIVE

Our objective was to determine whether payments that the Medicare contractor for Jurisdiction 9 made to providers for selected outpatient drugs were correct.

BACKGROUND

Medicare Part B

Part B of Medicare provides supplementary medical insurance, including coverage for the cost of outpatient drugs. CMS administers Part B and contracts with Medicare contractors to, among other things, determine reimbursement amounts and pay claims, conduct reviews and audits, and safeguard against fraud and abuse. Medicare contractors must establish and maintain efficient

¹ Currently, Medicare administrative contractors pay Medicare claims. For some jurisdictions, fiscal intermediaries paid claims during some or all of our audit period. In this report, the term “Medicare contractor” means the fiscal intermediary or Medicare administrative contractor, whichever is applicable.

² Biologicals are medicinal preparations made from living organisms and their products (for example, serums, vaccines, antigens, and antitoxins); radiopharmaceuticals are radioactive drugs used for diagnostic or therapeutic purposes.

³ Although the selected provider and Herceptin audits included only outpatient drugs, the payments-greater-than-charges audits, with overpayments totaling \$106 million, and the excessive-claim-payments audits, with overpayments totaling \$44 million, included all types of outpatient services. Some of the reviews of payments that exceeded provider charges covered amounts between \$500 and \$1,000. We considered high-risk payments as those that exceeded \$10,000 for claims under Part B and exceeded \$50,000 for claims for outpatient services. We estimated the total overpayment amount for selected outpatient drug services for these audits.

and effective internal controls.⁴ These controls, including those over automatic data processing systems, are intended to prevent increased program costs caused by incorrect or delayed payments. Medicare contractors use the Common Working File (CWF) and Fiscal Intermediary Standard System (FISS) to validate providers' claims for outpatient services before paying the claims. Medicare contractors calculate the payment for each outpatient service using FISS's Hospital Outpatient Prospective Payment System (OPPS). These three systems can also detect certain improper payments.

Healthcare Common Procedure Coding System Codes

Medicare contractors pay providers using established rates for each hospital outpatient unit of service claimed, subject to any Part B deductible and coinsurance. Medicare guidance requires providers to submit accurate claims for outpatient services. Each submitted claim may contain multiple line items that detail most provided services.⁵ Providers must use standardized codes, called Healthcare Common Procedure Coding System (HCPCS) codes, for drugs administered and report units of service in multiples of the units shown in the HCPCS narrative description. For example, if the description for the HCPCS code specifies 50 milligrams and 200 milligrams are administered, units are shown as 4.

Medicare Contractor Edits

To reduce payment errors, CMS introduced a number of claims-review initiatives that identify and address incorrect billing due to coverage or coding errors made by providers. One of these review initiatives, established in January 2007, is the "Medically Unlikely Edits" prepayment claims review program. Medically unlikely edits are developed and maintained by the CMS National Correct Coding Initiative contractor.⁶

Medically unlikely edits are automatic prepayment edits within the FISS that compare the billed units with the maximum units of service for a given HCPCS code. The maximum units of service are the maximum number of units that a provider would reasonably administer to a patient for that service on a single date of service. A medically unlikely edit denies line items for units of service that exceed the maximum units for the HCPCS code billed.

Medically unlikely edits, which are updated each quarter, do not exist for all HCPCS codes. Before implementing new medically unlikely edits, CMS offers national health care

⁴ CMS, *Medicare Financial Management Manual*, Pub. No. 100-06, chapter 7, section 10.

⁵ Some claim line items included on outpatient claims do not identify the specific services provided but just identify the revenue code and billed charges. These line items are generally not paid because the services are bundled into other services that are specifically identified.

⁶ The contractor, Correct Coding Solutions, LLC, provides a revised medically unlikely edit table to CMS each quarter. CMS then distributes the revised medically unlikely edit table with the revised national correct coding initiative table to the Medicare contractors.

organizations the opportunity to review and comment on the proposed edits. Medicare contractors must include the medically unlikely edits in their payment systems.⁷

First Coast Service Options, Inc.

During our audit period (July 1, 2009, through June 30, 2012), First Coast Service Options, Inc. (First Coast), was the Medicare contractor for Jurisdiction 9 (Florida, Puerto Rico, and the U.S. Virgin Islands). However, we did not include in our review the U.S. Virgin Islands providers because they were not paid under the standard Medicare outpatient payment system.

HOW WE CONDUCTED THIS REVIEW

During our audit period, the Medicare contractor for Jurisdiction 9 paid providers \$560 million for 1.1 million line items for selected outpatient drugs. We reviewed 311 line items⁸ with total payments of \$1,937,224 that were at risk for overpayment. These line items were for outpatient drugs with payment status indicator code “G” or “K.”⁹ We used computer matching, data mining, and other analytical techniques to identify the line items potentially at risk for noncompliance with Medicare billing requirements. We evaluated compliance with selected billing requirements, but we did not use medical review to determine whether services were medically necessary.

We conducted this performance audit in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives.

See Appendix B for the details of our scope and methodology.

FINDINGS

Payments that the Medicare contractor for Jurisdiction 9 made to providers for 112 of the 311 line items for outpatient drugs we reviewed were not correct. These incorrect payments resulted in overpayments of \$445,245 and underpayments of \$3,291 that the providers had not identified, refunded, or adjusted by the beginning of our audit. Before our fieldwork, providers had refunded \$115,996 of overpayments for another 37 line items. The remaining 162 line items were correct.

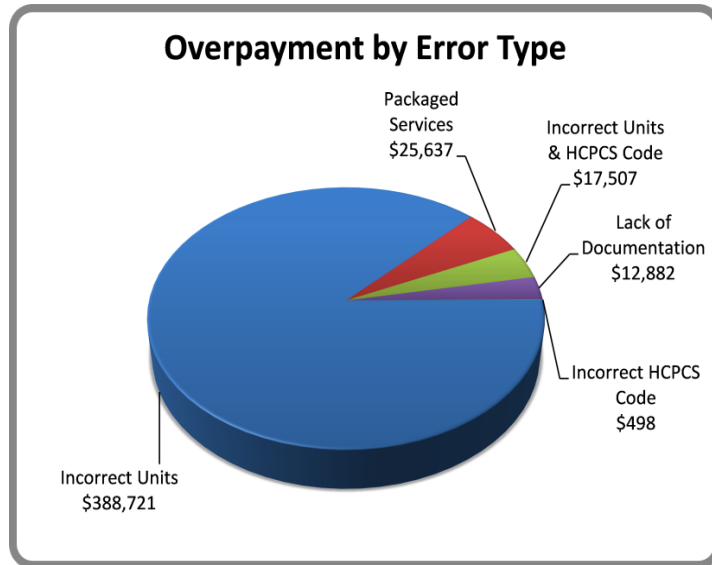

⁷ CMS makes the majority of medically unlikely edits publicly available on its Web site. However, CMS does not publish all medically unlikely edit values, particularly for outpatient drugs, because of fraud and abuse concerns.

⁸ In this audit, we did not review entire claims; rather, we reviewed specific line items within the claims.

⁹ “G” and “K” identify drugs that are separately paid by Medicare. “G” identifies drugs and biologicals paid using the OPPS that include a pass-through payment. (Pass-through payments are additional payments made for a short time to cover the cost for certain innovative medical devices, drugs, and biologicals that exceed Medicare’s OPPS payment amount.) “K” identifies drugs, biologicals, therapeutic radiopharmaceuticals, brachytherapy sources of radiation, blood, and blood products paid using the OPPS without a pass-through payment.

For the 91 incorrect line items with overpayments of \$445,245 that had not been refunded, providers:

- reported incorrect units of service on 77 line items, resulting in overpayments of \$388,721;
- billed separately for outpatient drugs for which payment was packaged with the primary service on 2 line items, resulting in overpayments of \$25,637;
- reported a combination of incorrect units of service and incorrect HCPCS codes on 2 line items, resulting in overpayments of \$17,507;
- did not provide supporting documentation for 9 line items, resulting in overpayments of \$12,882; and
- used incorrect HCPCS codes on 1 line item, resulting in an overpayment of \$498.

For the 21 incorrect line items with underpayments of \$3,291 that had not been adjusted, we notified the providers of the underpayments so that they could submit adjustment claims.

Providers attributed the incorrect billings to clerical errors and to provider billing systems that could not prevent or detect the incorrect billing of outpatient drug services. The Medicare contractor overpaid these providers because neither the CWF nor the FISS had sufficient edits in place to prevent or detect the overpayments.

FEDERAL REQUIREMENTS

The Social Security Act (the Act) and CMS Pub. No. 100-04, *Medicare Claims Processing Manual* (the Manual), provide overall requirements related to the billing and payment of hospital outpatient services. They require that providers submit accurate and complete bills to Medicare

for allowable and covered services and identify the number of units of service for each outpatient drug administered to a Medicare beneficiary using the correct HCPCS code.¹⁰

¹⁰ These requirements are found in the Act, section 1833(e), and the Manual, chapter 17, section 90.2.A.

See Appendix C for details on the Federal requirements related to Medicare contractor payment and provider billing for selected outpatient drugs.

OVERPAYMENTS TO PROVIDERS THAT BILLED INCORRECTLY OR DID NOT DOCUMENT THAT THE SERVICES BILLED HAD BEEN PERFORMED

Incorrect Number of Units of Service

Providers reported incorrect units of service on 77 line items, resulting in overpayments of \$388,721. The incorrect units of service involved 29 different outpatient drugs. The following are examples:

- One provider administered 720 micrograms of filgrastim to a patient and billed for 8 units of service (2,400 micrograms). Using the HCPCS description (injection, filgrastim, 300 micrograms), the correct number of units to bill for 720 micrograms was 3.¹¹ On 19 separate occasions this type of error occurred, and as a result, the Medicare contractor paid the provider \$39,146 when it should have paid \$18,185, an overpayment of \$20,961.
- Another provider administered 200 units of docetaxel to a patient and billed for 360 units of service. Similar errors occurred on two line items. As a result, the Medicare contractor paid the provider \$15,771 when it should have paid \$8,434, an overpayment of \$7,337.

In total, the Medicare contractor paid 30 providers \$530,383 when it should have paid \$141,662, an overpayment of \$388,721.

Billed Separately for Packaged Services

For selected outpatient drugs that have multiple HCPCS codes, one provider billed Medicare on two line items using the HCPCS code that Medicare pays separately instead of the HCPCS code that Medicare does not pay separately, resulting in overpayments of \$25,637. These line items involved 2 different packaged outpatient drugs.

Medicare pays for outpatient drugs that are considered primary procedures but does not pay separately for outpatient drugs when their payment is packaged in the payment of a primary procedure. Medicare has different HCPCS codes for similar drugs to distinguish which are paid separately and which are not paid separately.

For example, a provider billed Medicare for the chemotherapy drug melphalan hydrochloride (HCPCS code J9245) rather than the chemotherapy drug carboplatin (HCPCS code J9045), the drug actually administered. During the dates of service that the provider administered this drug, Medicare packaged carboplatin in the payment for other services and did not provide for separate reimbursement under the OPPI. As a result, the Medicare contractor paid the provider \$16,617 when it should have paid \$0, an overpayment of \$16,617.

¹¹ If the drug dose used in the care of a patient is not a multiple of the dose specified in the HCPCS narrative description, the provider rounds to the next highest unit (the Manual, chapter 17, § 10).

In total, the Medicare contractor paid the one provider \$25,637 for packaged drugs when it should have paid \$0, an overpayment of \$25,637.

Combination of Incorrect Number of Units of Service and Incorrect Healthcare Common Procedure Coding System Codes

Providers reported a combination of incorrect units of service and incorrect HCPCS codes on two line items. These errors resulted in overpayments of \$17,507.

- One provider billed Medicare on 1 line item for 152 units of service for clofarabine (HCPCS code J9027, 1 milligram per unit), which is indicated for the treatment of relapsed or refractory acute lymphoblastic leukemia. However, the provider should have billed Medicare for 62 units of service for ixabepilone (HCPCS code J9207, 1 milligram per unit), which is indicated for the treatment of patients with metastatic or locally advanced breast cancer and was the dose actually administered. As a result of this error, the Medicare contractor paid the provider \$16,364 when it should have paid \$3,161, an overpayment of \$13,203.
- Another provider billed Medicare on 1 line item for 16 units of service for docetaxel (HCPCS code J9170, 20 milligrams per unit), which is a microtubule inhibitor indicated for the treatment of various forms of cancer. However, the provider should have billed Medicare for 11 units of paclitaxel (HCPCS code J9265, 30 milligrams per unit), which is indicated for the treatment of advanced carcinoma of the ovary and was the dose actually administered. As a result of this error, the Medicare contractor paid the provider \$4,383 when it should have paid \$79, an overpayment of \$4,304.

In total, the Medicare contractor paid the two providers \$20,747 when it should have paid \$3,240, an overpayment of \$17,507.

Lack of Supporting Documentation

Four providers billed Medicare on nine line items for which the providers did not provide any documentation to support that a patient had received the drug service billed. The providers agreed to cancel the claims associated with these line items or file adjusted claims and refund the combined \$12,882 in overpayments that they received.

Incorrect Healthcare Common Procedure Coding System Codes

One provider used an incorrect HCPCS code on one line item, resulting in an overpayment of \$498. The provider billed Medicare for 2 units of service for leuprolide acetate injections (HCPCS code J1950, 3.75 milligrams per unit), which is indicated for the treatment of endometriosis and uterine leiomyomas and malignant neoplasms of the breast. However, the provider should have billed Medicare for 2 units of service for leuprolide acetate injections (HCPCS code J9217, 7.5 milligrams per unit), which is indicated for the treatment of prostate cancer and was the drug actually administered. As a result of this error, the Medicare contractor paid the provider \$825 when it should have paid \$327, an overpayment of \$498.

UNDERPAYMENTS TO PROVIDERS THAT BILLED INCORRECTLY

Two providers billed Medicare on 21 line items for outpatient drug services that included incorrect units of service or incorrect HCPCS codes, resulting in underpayments of \$3,291. We identified these underpayments and notified the providers so that they could submit adjustment claims for the underpayment amounts.

CAUSES OF INCORRECT MEDICARE PAYMENTS

The providers attributed the incorrect billings to clerical errors and to provider billing systems that could not prevent or detect the incorrect billing of outpatient drug services. These billing system errors included chargemaster¹² errors and other system errors.

The Medicare contractor overpaid these providers because neither the CWF nor the FISS had sufficient edits in place to prevent or detect the overpayments. In effect, CMS relied on providers to notify the Medicare contractor of incorrect payments and on beneficiaries to review their *Medicare Summary Notice* and disclose any overpayments.¹³

Other required edits in the CWF and FISS did not detect the errors that we found because the edits suspended only those payments that exceeded a payment amount threshold but did not flag payments that exceeded maximum billing units. Medically unlikely edits, which deny line items for excessive units of service billed, do not exist for all HCPCS codes.

RECOMMENDATIONS

We recommend that First Coast:

- recover the \$445,245 in identified overpayments,
- verify the payment of \$3,291 in identified underpayments, and
- use the results of this audit in its ongoing provider education activities.

FIRST COAST COMMENTS

In written comments on our draft report, First Coast mostly concurred with our recommendations and provided information on actions that it planned to take to address our recommendations. First Coast's comments are included in their entirety as Appendix D.

¹² A provider's chargemaster is an automatic data processing system that providers use as part of their billing systems. The chargemaster contains data on every chargeable item or procedure that the provider offers, including (1) a factor that converts a drug's dosage to the number of units to bill and (2) whether to charge for waste.

¹³ The Medicare contractor sends a *Medicare Summary Notice*—an explanation of benefits—to the beneficiary after the provider files a claim for services. The notice explains the services billed, the approved amount, the Medicare payment, and the amount due from the beneficiary.

APPENDIX B: AUDIT SCOPE AND METHODOLOGY

SCOPE

During our audit period (July 1, 2009, through June 30, 2012), the Medicare contractor for Jurisdiction 9 paid providers \$560 million for 1.1 million line items for selected outpatient drugs. We reviewed 311 line items, totaling \$1,937,224, that the Medicare contractor paid to 48 providers. We did not review entire claims; rather, we reviewed specific line items within the claims. These line items included selected outpatient drugs with payment status indicator code “G” or “K.” “G” identifies drugs and biologicals paid using the OPPS that include a pass-through payment.¹⁴ “K” identifies drugs, biologicals, therapeutic radiopharmaceuticals, brachytherapy sources of radiation, blood, and blood products paid using the OPPS without a pass-through payment.

We did not review the overall internal control structure of the Medicare contractor or the providers because our objective did not require us to do so. Rather, we limited our review to (1) the Medicare contractor’s internal controls to prevent the overpayment of Medicare claims associated with the selected outpatient drugs and (2) providers’ internal controls to prevent incorrect billing for outpatient drugs. Our review allowed us to establish reasonable assurance of the authenticity and accuracy of the data obtained from CMS’s National Claims History file, but we did not assess the completeness of the file.

We conducted our audit from October 2012 through August 2013 and performed fieldwork by contacting First Coast in Jacksonville, Florida, and 48 providers that received the selected Medicare payments during our audit period.

METHODOLOGY

To accomplish our objective, we:

- reviewed applicable Federal laws, regulations, and guidance;
- used CMS’s National Claims History file to identify outpatient line items for selected outpatient drugs (HCPCS codes with status indicator code “G” or “K”) for which Medicare payments were made during our audit period;
- used computer matching, data mining, and other analytical techniques to identify payments for outpatient drugs for which the number of units the provider billed was more than the number of units the provider would reasonably administer to a patient on a single date of service because these line items were at risk for noncompliance with Medicare billing requirements;
- selected 311 line items at risk of error, totaling \$1,937,224 that the Medicare contractor paid to 48 providers;

¹⁴ Pass-through payments are additional payments made for a short time to cover the cost for certain innovative medical devices, drugs, and biologicals that exceed Medicare’s OPPS payment amount schedule.

- requested that 48 providers furnish documentation to support the services billed, including:
 - the physician’s order supporting the outpatient drug and amount ordered,
 - the drug administration record supporting that the outpatient drug was administered in the amount ordered, and
 - relevant financial or administrative notes related to the Medicare claim;
- reviewed the documentation provided to determine whether:
 - the billed information for the selected line items was correct and, if not, why the line item was incorrect;
 - the providers identified and adjusted the claim items before our review; and
 - the claimed units of the outpatient drug were based on dosing instructions provided with the packaging and any limitation on use (such as single-use or multiuse);
- calculated overpayment amounts, including adjustments to the claim due to changes in the allocation of the coinsurance amounts, in accordance with Federal requirements and Medicare payment procedures or used the amount determined by the Medicare contractor; and
- discussed the results of our review with providers and the Medicare contractor.

We conducted this performance audit in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives.

APPENDIX C: FEDERAL REQUIREMENTS RELATED TO MEDICARE CONTRACTOR PAYMENT AND PROVIDER BILLING FOR SELECTED OUTPATIENT DRUGS

FEDERAL LAW AND REGULATIONS

The Act, section 1833(e), states: “No payment shall be made to any provider of services ... unless there has been furnished such information as may be necessary in order to determine the amounts due such provider ... for the period with respect to which the amounts are being paid....”

Further, the Act, sections 1861(s)(2) and 1861(t), define the terms “medical and other health services” and “drugs and biologicals,” respectively. These sections identify those drug and biological services that are covered services under the Medicare Part B program and also identify any noncovered or excluded drug and biological services.

Federal regulations provide the methodology that Medicare uses to calculate payment for drugs and biologicals, including the calculation of the coinsurance payment, which is limited to the inpatient deductible amount for each year (42 CFR § 419.41).

CENTERS FOR MEDICARE & MEDICAID SERVICES GUIDANCE

CMS Pub. No. 100-06, *Medicare Financial Management Manual*, chapter 7, section 10, states: “[CMS] contractors shall administer the Medicare program efficiently and economically to achieve the program objectives.” Further, the Federal Managers’ Financial Integrity Act of 1982 (FMFIA) “establishes internal control requirements that shall be met by CMS. For CMS to meet the requirements of FMFIA, CMS contractors shall demonstrate that they comply with the FMFIA guidelines.” Consequently, “the contractor shall establish and maintain efficient and effective internal controls to perform the requirements of the contract....”

The Manual, chapter 1, section 80.3.2.2, states: “In order to be processed correctly and promptly, a bill must be completed accurately.”

The Manual, chapter 23, section 20.3, states: “[P]roviders must use HCPCS codes ... for most outpatient services.”

The Manual, chapter 4, section 20.4, states: “The definition of service units ... is the number of times the service or procedure [HCPCS code] being reported was performed.”

The Manual, chapter 17, section 90.2.A, states: “It is ... of great importance that hospitals billing for these products [outpatient drugs] make certain that the reported units of service of the reported HCPCS code are consistent with the quantity of a drug, biological, or radiopharmaceutical that was used in the care of the patient.”

The Manual, chapter 17, section 10, states: “If the drug dose used in the care of a patient is not a multiple of the HCPCS code dosage descriptor, the provider rounds to the next highest unit based on the HCPCS long descriptor for the code in order to report the dose provided.”

The Manual, chapter 17, section 70, states that, if the provider is billing for an outpatient drug for which a “HCPCS is required, units are entered in multiples of the units shown in the HCPCS narrative description. For example, if the description for the code is 50 [milligrams], and 200 [milligrams] are provided, units are shown as 4....”

The Manual, chapter 17, section 40, states:

When a physician, hospital or other provider or supplier must discard the remainder of a single use vial or other single use package after administering a dose/quantity of the drug or biological to a Medicare patient, the program provides payment for the amount of drug or biological discarded as well as the dose administered, up to the amount of the drug or biological as indicated on the vial or package label.

The section further notes: “Multi-use vials are not subject to payment for discarded amounts of drug or biological.”

The Manual, chapter 1, section 140.1, states that Medicare contractors must “edit for outpatient and inpatient Part B claims that meet or exceed a reimbursement amount of \$50,000.” The section further notes that Medicare contractors must “suspend those claims receiving the threshold edit for development and contact providers to resolve billing errors.” If the Medicare contractor determines that the reimbursement is excessive and corrections are required, the claim must be returned to the provider. If the billing is accurate and the reimbursement is not excessive, the Medicare contractors will override the edit and process the claim for payment.

CMS Pub. No. 100-02, *Medicare Benefit Policy Manual* (chapter 15, section 50.4.2), states:

An unlabeled use of a drug is a use that is not included as an indication on the drug’s label as approved by the FDA. FDA approved drugs used for indications other than what is indicated on the official label may be covered under Medicare if the carrier determines the use to be medically accepted, taking into consideration the major drug compendia, authoritative medical literature and/or accepted standards of medical practice.... These decisions are made by the contractor on a case-by-case basis.

APPENDIX D: FIRST COAST COMMENTS

Ms. Lori S. Pilcher, Regional Inspector General
Office of Inspector General
Office of Audit Services, Region IV
61 Forsyth Street, SW, Suite 3T41
Atlanta, GA 30303

Reference: A-04-13-07038

Dear Ms. Pilcher:

We received the U.S. Department of Health & Human Services, Office of Inspector General (OIG) draft report entitled, "*The Medicare Contractor for Jurisdiction 9 Overpaid Providers for Selected Outpatient Drugs*" and reviewed the findings and recommendations. We appreciate the opportunity to review and provide comments prior to release of the final report.

In the draft report, you outlined three recommendations that we have addressed as follows:

Recommendation:

Recover the \$445,245 in identified overpayments,

Response:

Upon receipt of the specific claim information, First Coast Claims Processing will pursue recovery of the overpaid amounts.

Please be advised that in researching a sample of the cases identified we note that some claims have already been cancelled by the provider and therefore would not result in recovery of dollars in the effort to carry out this recommendation. Further, due to limitations in the process for recovering dollars and the amount of historical pricing

information maintained within the Part A FISS system, there may be differences in what can be recovered for the older services. We can easily note these differences in the final reconciliation report when the recommendation is carried out. Based on this, we do not anticipate that the amounts cited in the report will be exactly what are recoverable at this time.

Recommendation:

Verify the payment of \$3,291 in identified underpayments, and

Response:

Upon receipt of the final report First Coast Claims Processing will confirm the identified underpayment.

Recommendation:

Use the results of this audit in its ongoing provider education activities.

Response:

First Coast will incorporate examples of billing errors found in this report in future education efforts. Educational efforts will include an emphasis on billing of outpatient drug services that led to claims being reimbursed at excessive payment amounts. Claims Processing will coordinate with Provider Education to create reminders to providers regarding the correct billing of Outpatient drugs.

Again, we appreciate the opportunity to review and provide comments prior to release of the final report. If you have any questions regarding our responses, please contact Mr. Gregory W. England at (904) 791-8364.

Sincerely,

Sandy Coston
