Office of Inspector General

<https://oig.hhs.gov>

The mission of the Office of Inspector General (OIG), as mandated by Public Law 95-452, as amended, is to protect the integrity of the Department of Health and Human Services (HHS) programs, as well as the health and welfare of beneficiaries served by those programs. This statutory mission is carried out through a nationwide network of audits, investigations, and inspections conducted by the following operating components:

Office of Audit Services

The Office of Audit Services (OAS) provides auditing services for HHS, either by conducting audits with its own audit resources or by overseeing audit work done by others. Audits examine the performance of HHS programs and/or its grantees and contractors in carrying out their respective responsibilities and are intended to provide independent assessments of HHS programs and operations. These audits help reduce waste, abuse, and mismanagement and promote economy and efficiency throughout HHS.

Office of Evaluation and Inspections

The Office of Evaluation and Inspections (OEI) conducts national evaluations to provide HHS, Congress, and the public with timely, useful, and reliable information on significant issues. These evaluations focus on preventing fraud, waste, or abuse and promoting economy, efficiency, and effectiveness of departmental programs. To promote impact, OEI reports also present practical recommendations for improving program operations.

Office of Investigations

The Office of Investigations (OI) conducts criminal, civil, and administrative investigations of fraud and misconduct related to HHS programs, operations, and beneficiaries. With investigators working in all 50 States and the District of Columbia, OI utilizes its resources by actively coordinating with the Department of Justice and other Federal, State, and local law enforcement authorities. The investigative efforts of OI often lead to criminal convictions, administrative sanctions, and/or civil monetary penalties.

Office of Counsel to the Inspector General

The Office of Counsel to the Inspector General (OCIG) provides general legal services to OIG, rendering advice and opinions on HHS programs and operations and providing all legal support for OIG's internal operations. OCIG represents OIG in all civil and administrative fraud and abuse cases involving HHS programs, including False Claims Act, program exclusion, and civil monetary penalty cases. In connection with these cases, OCIG also negotiates and monitors corporate integrity agreements. OCIG renders advisory opinions, issues compliance program guidance, publishes fraud alerts, and provides other guidance to the health care industry concerning the anti-kickback statute and other OIG enforcement authorities.

Notices

THIS REPORT IS AVAILABLE TO THE PUBLIC
at <https://oig.hhs.gov>

Section 8M of the Inspector General Act, 5 U.S.C. App., requires that OIG post its publicly available reports on the OIG website.

OFFICE OF AUDIT SERVICES FINDINGS AND OPINIONS

The designation of financial or management practices as questionable, a recommendation for the disallowance of costs incurred or claimed, and any other conclusions and recommendations in this report represent the findings and opinions of OAS. Authorized officials of the HHS operating divisions will make final determination on these matters.

Report in Brief

Date: May 2021

Report No. A-09-20-03034

U.S. DEPARTMENT OF HEALTH & HUMAN SERVICES
OFFICE OF INSPECTOR GENERAL

Why OIG Did This Audit

The Medicare hospice benefit allows providers to claim Medicare reimbursement for hospice services provided to individuals with a life expectancy of 6 months or less who have elected hospice care. Previous OIG audits and evaluations found that Medicare inappropriately paid for hospice services that did not meet certain Medicare requirements.

Our objective was to determine whether hospice services provided by Franciscan Hospice (Franciscan) complied with Medicare requirements.

How OIG Did This Audit

Our audit covered 21,537 claims for which Franciscan (located in University Place, Washington) received Medicare reimbursement of \$101.5 million for hospice services provided from January 1, 2016, through December 31, 2017. We reviewed a random sample of 100 claims. We evaluated compliance with selected Medicare billing requirements and submitted these sampled claims and the associated medical records to an independent medical review contractor to determine whether the services met coverage, medical necessity, and coding requirements.

Medicare Hospice Provider Compliance Audit: Franciscan Hospice

What OIG Found

Franciscan received Medicare reimbursement for hospice services that did not comply with Medicare requirements. Of the 100 hospice claims in our sample, 79 claims complied with Medicare requirements. However, the remaining 21 claims did not comply with the requirements. Specifically, for 19 claims, the clinical record did not support the beneficiary's terminal prognosis, and for the remaining 2 claims, there was no documentation to support the hospice services that Franciscan billed to Medicare.

Improper payment of these claims occurred because Franciscan's policies and procedures were not effective in ensuring that the clinical documentation it maintained supported the terminal illness prognosis and the hospice services billed to Medicare. On the basis of our sample results, we estimated that Franciscan received at least \$13 million in unallowable Medicare reimbursement for hospice services.

What OIG Recommends and Franciscan Comments

We recommend that Franciscan: (1) refund to the Federal Government the portion of the estimated \$13 million for hospice services that did not comply with Medicare requirements and that are within the 4-year reopening period; (2) based upon the results of this audit, exercise reasonable diligence to identify, report, and return any overpayments in accordance with the 60-day rule and identify any of those returned overpayments as having been made in accordance with this recommendation; and (3) strengthen its policies and procedures to ensure that hospice services comply with Medicare requirements.

In written comments on our draft report, Franciscan disagreed with our findings for 12 of the 19 sampled claims for which the clinical record did not support the beneficiary's terminal prognosis and said that a physician's clinical judgment is fundamental in determining that prognosis. Franciscan also disagreed with our use of extrapolation across the audit period. Franciscan agreed with our second recommendation and disagreed with our first and third recommendations.

After reviewing Franciscan's comments, we maintain that our findings and recommendations are valid. Federal regulations require that clinical information and other documentation support the beneficiary's terminal prognosis and be filed in the medical records. The report contains the details of our response.

INTRODUCTION

WHY WE DID THIS AUDIT

The Medicare hospice benefit allows providers to claim Medicare reimbursement for hospice services provided to individuals with a life expectancy of 6 months or less who have elected hospice care. Previous Office of Inspector General (OIG) audits and evaluations found that Medicare inappropriately paid for hospice services that did not meet certain Medicare requirements.¹

OBJECTIVE

Our objective was to determine whether hospice services provided by Franciscan Hospice (Franciscan) complied with Medicare requirements.

BACKGROUND

The Medicare Program

Title XVIII of the Social Security Act (the Act) established the Medicare program, which provides health insurance coverage to people aged 65 and over, people with disabilities, and people with end-stage renal disease. The Centers for Medicare & Medicaid Services (CMS) administers the Medicare program.

Medicare Part A, also known as hospital insurance, provides for the coverage of various types of services, including hospice services.² CMS contracts with Medicare Administrative Contractors (MACs) to process and pay Medicare hospice claims in four home health and hospice jurisdictions.

The Medicare Hospice Benefit

To be eligible to elect Medicare hospice care, a beneficiary must be entitled to Medicare Part A and certified by a physician as being terminally ill (i.e., as having a medical prognosis with a life expectancy of 6 months or less if the illness runs its normal course).³ Hospice care is palliative (supportive), rather than curative, and includes, among other things, nursing care, medical social services, hospice aide services, medical supplies, and physician services. The Medicare hospice benefit has four levels of care: (1) routine home care, (2) general inpatient care,

¹ See Appendix B for a list of related OIG reports on Medicare hospice services.

² The Act §§ 1812(a)(4) and (5).

³ The Act §§ 1814(a)(7)(A) and 1861(dd)(3)(A) and 42 CFR §§ 418.20 and 418.3.

(3) inpatient respite care, and (4) continuous home care. Medicare provides an all-inclusive daily payment based on the level of care.⁴

Beneficiaries eligible for the Medicare hospice benefit may elect hospice care by filing a signed election statement with a hospice.⁵ Upon election, the hospice assumes the responsibility for medical care of the beneficiary's terminal illness, and the beneficiary waives all rights to Medicare payment for services that are related to the treatment of the terminal condition or related conditions for the duration of the election, except for services provided by the designated hospice directly or under arrangements or services of the beneficiary's attending physician if the physician is not employed by or receiving compensation from the designated hospice.⁶

The hospice must submit a notice of election (NOE) to its MAC within 5 calendar days after the effective date of election. If the hospice does not submit the NOE to its MAC within the required timeframe, Medicare will not cover and pay for days of hospice care from the effective date of election to the date that the NOE was submitted to the MAC.⁷

Beneficiaries are entitled to receive hospice care for two 90-day benefit periods, followed by an unlimited number of 60-day benefit periods.⁸ At the start of the initial 90-day benefit period of care, the hospice must obtain written certification of the beneficiary's terminal illness from the hospice medical director or the physician member of the hospice interdisciplinary group⁹ and the beneficiary's attending physician, if any. For subsequent benefit periods, a written certification by only the hospice medical director or the physician member of the hospice interdisciplinary group is required.¹⁰ The initial certification and all subsequent recertifications must include a brief narrative explanation of the clinical findings that supports a life expectancy

⁴ 42 CFR § 418.302. For dates of service on or after January 1, 2016, there are two daily payment rates for routine home care: a higher rate for the first 60 days and a lower rate for days 61 and beyond. 80 Fed. Reg. 47142, 47172 (Aug. 6, 2015).

⁵ 42 CFR § 418.24(a)(1).

⁶ The Act § 1812(d)(2)(A) and 42 CFR § 418.24(d). After our audit period (January 1, 2016, through December 31, 2017), the text of 42 CFR § 418.24(d) was moved to 42 CFR § 418.24(e), effective October 1, 2019. 84 Fed. Reg. 38484, 38544 (Aug. 6, 2019).

⁷ 42 CFR §§ 418.24(a)(2) and (a)(3).

⁸ 42 CFR § 418.21(a).

⁹ A hospice interdisciplinary group consists of individuals who together formulate the hospice plan of care for terminally ill beneficiaries. The interdisciplinary group must include a doctor of medicine or osteopathy, a registered nurse, a social worker, and a pastoral or other counselor, and may include others, such as hospice aides, therapists, and trained volunteers (42 CFR § 418.56).

¹⁰ 42 CFR § 418.22(c).

of 6 months or less.¹¹ The written certification may be completed no more than 15 calendar days before the effective date of election or the start of the subsequent benefit period.¹²

A hospice physician or hospice nurse practitioner must have a face-to-face encounter with each hospice beneficiary whose total stay across all hospices is anticipated to reach a third benefit period.¹³ The physician or nurse practitioner conducting the face-to-face encounter must gather and document clinical findings to support a life expectancy of 6 months or less.¹⁴

Hospice providers must establish and maintain a clinical record for each hospice patient.¹⁵ The record must include all services, whether furnished directly or under arrangements made by the hospice. Clinical information and other documentation that support the medical prognosis of a life expectancy of 6 months or less if the terminal illness runs its normal course must be filed in the medical record with the written certification of terminal illness.¹⁶

Medicare Requirements To Identify and Return Overpayments

OIG believes that this audit report constitutes credible information of potential overpayments. Upon receiving credible information of potential overpayments, providers must exercise reasonable diligence to identify overpayments (i.e., determine receipt of and quantify any overpayments) during a 6-year lookback period. Providers must report and return any identified overpayments by the later of: (1) 60 days after identifying those overpayments or (2) the date that any corresponding cost report is due (if applicable). This is known as the 60-day rule.¹⁷

The 6-year lookback period is not limited by OIG's audit period or restrictions on the Government's ability to reopen claims or cost reports. To report and return overpayments

¹¹ 42 CFR § 418.22(b)(3).

¹² 42 CFR § 418.22(a)(3).

¹³ Hospices that admit a patient who previously received hospice services (from the admitting hospice or from another hospice) must consider the patient's entire Medicare hospice stay to determine in which benefit period the patient is being served and whether a face-to-face visit will be required for recertification. 75 Fed. Reg. 70372, 70435 (Nov. 17, 2010).

¹⁴ 42 CFR §§ 418.22(a)(4), (b)(3)(v), and (b)(4).

¹⁵ 42 CFR §§ 418.104 and 418.310.

¹⁶ 42 CFR §§ 418.22(b)(2) and (d)(2).

¹⁷ The Act § 1128J(d); 42 CFR §§ 401.301–401.305; 81 Fed. Reg. 7654 (Feb. 12, 2016).

under the 60-day rule, providers can request the reopening of initial claims determinations, submit amended cost reports, or use any other appropriate reporting process.¹⁸

Franciscan Hospice

Franciscan, located in University Place, Washington, is a nonprofit provider that furnishes hospice and palliative care, including nursing and medical care, physical therapy, in-home medical equipment, bereavement counseling, massage, aromatherapy, and music therapy. From January 1, 2016, through December 31, 2017 (audit period), Franciscan provided hospice services to approximately 6,100 beneficiaries and received Medicare reimbursement of about \$103 million.¹⁹ National Government Services, Inc. (NGS), serves as the MAC for Franciscan.

HOW WE CONDUCTED THIS AUDIT

Franciscan received Medicare Part A reimbursement of \$102,634,214 for hospice services provided during our audit period, representing 23,459 paid claims. After we excluded 1,922 claims, totaling \$1,147,394, our audit covered 21,537 claims totaling \$101,486,820.²⁰ We reviewed a random sample of 100 of these claims, totaling \$468,212, to determine whether hospice services complied with Medicare requirements. Specifically, we evaluated compliance with selected billing requirements and submitted these sampled claims and the associated medical records to an independent medical review contractor to determine whether the services met coverage, medical necessity, and coding requirements.

We conducted this performance audit in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives.

Appendix A describes our audit scope and methodology, Appendix C describes our statistical sampling methodology, and Appendix D contains our sample results and estimates.

¹⁸ 42 CFR §§ 401.305(d), 405.980(c)(4), and 413.24(f); CMS, *Provider Reimbursement Manual—Part 1*, Pub. No. 15-1, § 2931.2; 81 Fed. Reg. at 7670.

¹⁹ Claims data for the period January 1, 2016, through December 31, 2017, were the most current data available when we started our audit.

²⁰ We excluded hospice claims that had a payment amount of less than \$1,000 (1,888 claims), were identified in the Recovery Audit Contractor data warehouse as having been reviewed by another party (17 claims), or had compromised beneficiary numbers (17 claims).

FINDINGS

Franciscan received Medicare reimbursement for hospice services that did not comply with Medicare requirements. Of the 100 hospice claims in our sample, 79 claims complied with Medicare requirements. However, the remaining 21 claims did not comply with the requirements. Specifically, for 19 claims, the clinical record did not support the beneficiary's terminal prognosis, and for the remaining 2 claims, there was no documentation to support the hospice services that Franciscan billed to Medicare. Improper payment of these claims occurred because Franciscan's policies and procedures were not effective in ensuring that the clinical documentation it maintained supported the terminal illness prognosis and the hospice services billed to Medicare.

On the basis of our sample results, we estimated that Franciscan received at least \$13 million in unallowable Medicare reimbursement for hospice services.²¹ As of the publication of this report, these overpayments include claims outside of the 4-year reopening period.²² Notwithstanding, Franciscan can request that a Medicare contractor reopen the initial determinations for those claims for the purpose of reporting and returning overpayments under the 60-day rule without being limited by the 4-year reopening period.²³

TERMINAL PROGNOSIS NOT SUPPORTED

To be eligible for the Medicare hospice benefit, a beneficiary must be certified as being terminally ill. Beneficiaries are entitled to receive hospice care for two 90-day benefit periods, followed by an unlimited number of 60-day benefit periods. At the start of the initial 90-day benefit period of care, the hospice must obtain written certification of the beneficiary's terminal illness from the hospice medical director or the physician member of the hospice interdisciplinary group and the individual's attending physician, if any. For subsequent benefit periods, a written certification from the hospice medical director or the physician member of the hospice interdisciplinary group is required. Clinical information and other documentation that support the beneficiary's medical prognosis must accompany the physician's certification and be filed in the medical record with the written certification of terminal illness.²⁴

For 19 of the 100 sampled claims, the clinical record provided by Franciscan did not support the associated beneficiary's terminal prognosis. Specifically, the independent medical review

²¹ The statistical lower limit is \$13,027,841. To be conservative, we recommend recovery of overpayments at the lower limit of a two-sided 90-percent confidence interval. Lower limits calculated in this manner are designed to be less than the actual overpayment total at least 95 percent of the time.

²² 42 CFR § 405.980(b)(2) (permitting a contractor to reopen within 4 years for good cause) and 42 CFR § 405.980(c)(2) (permitting a party to request that a contractor reopen within 4 years for good cause).

²³ 42 CFR § 405.980(c)(4).

²⁴ 42 CFR §§ 418.22(b)(2) and 418.104(a).

contractor determined that the records for these claims did not contain sufficient clinical information and other documentation to support the medical prognosis of a life expectancy of 6 months or less if the terminal illness ran its normal course.

SERVICES NOT DOCUMENTED

No Medicare payment shall be made to any provider unless it has furnished the information necessary to determine the amount due (the Act § 1815(a)).

For 2 of the 100 sampled claims, there was no documentation to support the hospice services billed to Medicare:

- For one sampled claim, Franciscan claimed and received Medicare reimbursement for a physician service that was not documented in the associated beneficiary's clinical record.²⁵
- For one sampled claim, Franciscan claimed and received Medicare reimbursement for an emergency department service that was not documented in the associated beneficiary's clinical record.

RECOMMENDATIONS

We recommend that Franciscan Hospice:

- refund to the Federal Government the portion of the estimated \$13,027,841 for hospice services that did not comply with Medicare requirements and that are within the 4-year reopening period;²⁶

²⁵ Payment for the physician service was based on the physician fee schedule for those physician services furnished by hospice employees or under arrangements with the hospice and was not included in the all-inclusive daily payment made to the hospice (42 CFR § 418.304(b)).

²⁶ OIG audit recommendations do not represent final determinations by Medicare. CMS, acting through a MAC or other contractor, will determine whether overpayments exist and will recoup any overpayments consistent with its policies and procedures. Providers have the right to appeal those determinations and should familiarize themselves with the rules pertaining to when overpayments must be returned or are subject to offset while an appeal is pending. The Medicare Part A and Part B appeals process has five levels (42 CFR § 405.904(a)(2)), and if a provider exercises its right to an appeal, the provider does not need to return overpayments until after the second level of appeal. Potential overpayments identified in OIG reports that are based on extrapolation may be re-estimated depending on CMS determinations and the outcome of appeals.

- based upon the results of this audit, exercise reasonable diligence to identify, report, and return any overpayments in accordance with the 60-day rule²⁷ and identify any of those returned overpayments as having been made in accordance with this recommendation; and
- strengthen its policies and procedures to ensure that hospice services comply with Medicare requirements.

FRANCISCAN COMMENTS AND OFFICE OF INSPECTOR GENERAL RESPONSE

In written comments on our draft report, Franciscan stated that it respectfully disagreed with more than half of our findings and also disagreed with our use of extrapolation across the audit period. Specifically, Franciscan disagreed with our findings for 12 of the 19 sampled claims for which the clinical record did not support the beneficiary’s terminal prognosis and provided specific responses for 5 of the 12 claims. (Franciscan did not comment on the two sampled claims for which no documentation was provided to support the hospice services billed to Medicare.) In addition, Franciscan agreed with our second recommendation and disagreed with our first and third recommendations. However, Franciscan stated that it would “refund the sample claims it does not challenge.”

In its specific comments on our findings, Franciscan stated that a physician’s clinical judgment is fundamental in determining (or certifying) the terminal prognosis and involves assessing the beneficiary’s full clinical picture. Franciscan also stated that our independent medical review contractor incorrectly utilized the Local Coverage Determinations (LCDs) as a checklist for hospice eligibility. Finally, Franciscan stated that extrapolation is inappropriate absent a “sustained or high level of payment error (meaning 50 percent or more).” Franciscan’s comments are included in their entirety as Appendix E.

After reviewing Franciscan’s comments, we maintain that our findings and recommendations are valid. Federal regulations require that clinical information and other documentation support the beneficiary’s terminal prognosis and be filed in the medical records. Below is a summary of Franciscan’s comments and our responses.

TERMINAL PROGNOSIS NOT SUPPORTED

Franciscan Comments

Franciscan disagreed with our findings for 12 of the 19 sampled claims that had a lack of support for a terminal prognosis. For each of these 12 claims, Franciscan’s third-party auditor

²⁷ This recommendation does not apply to any overpayments that are both within our sampling frame (i.e., the population from which we selected our statistical sample) and refunded based upon the extrapolated overpayment amount. Those overpayments are already covered in the previous recommendation.

found that the patient’s medical record supported the certifying physician’s clinical judgment that the patient met hospice criteria with a life expectancy of 6 months or less.

Franciscan emphasized the importance of a physician’s clinical judgment in determining a patient to be terminally ill, thereby qualifying the patient for the Medicare hospice benefit. Franciscan stated that a beneficiary is eligible for this benefit if the appropriate physician makes a clinical judgment that the patient is terminally ill in light of the patient’s complete medical picture, as evidenced by the patient’s medical records. Furthermore, Franciscan cited a Federal court decision that noted: “[N]one of the relevant [statutory or regulatory] language states that the documentary record underpinning a physician’s clinical judgement must prove the prognosis as a matter of medical fact.” Lastly, Franciscan stated that the court decision noted: “Congress said nothing to indicate that the medical documentation presented with a claim must prove the veracity of the clinical judgment on an after-the-fact review.”

Franciscan stated that our independent medical review contractor incorrectly utilized the LCDs as a checklist for hospice eligibility instead of considering patients’ unique combination of illnesses. Franciscan also stated that given that LCDs are guidelines and not binding, they should not be considered the exact criteria used for determining terminal illness.

Office of Inspector General Response

We used an independent medical review contractor that is a licensed physician who specializes in hospice and palliative medicine and is familiar with Medicare hospice guidelines and protocols. Our contractor properly used the appropriate statutory and regulatory hospice criteria, as well as applicable LCD guidelines, as the framework for its determinations. Specifically, our independent medical review contractor applied standards set out in 42 CFR § 418.22(b)(2), which requires that clinical information and other documentation that support the medical prognosis accompany the physician’s written certification of terminal illness and be filed in the medical record.²⁸ Our contractor acknowledged the physician’s terminal diagnosis and evaluated the medical records for each hospice claim (including necessary historical clinical records), guided by questions rooted in the Medicare requirements, to determine whether the certified terminal prognosis was supported. The Federal court decision that Franciscan referenced addressed whether a difference in clinical judgment can render a physician certification false for purposes of False Claims Act liability and therefore is inapplicable to OIG audit recommendations and CMS recoveries arising from OIG audits. However, our contractor did not require that documentation prove the medical prognosis. Instead, our contractor considered each beneficiary’s clinical picture and found that the records for the sampled claims did not contain sufficient clinical information and other documentation to support the medical prognosis of a life expectancy of 6 months or less if the terminal illness ran its normal course.

²⁸ Applicable LCD guidelines also state that the documentation must contain enough information to support terminal illness upon review.

USE OF EXTRAPOLATION

Franciscan Comments

Franciscan stated that our findings reflect a financial error rate of 20 percent, which drops by more than half after correcting for inaccuracies identified by Franciscan's third-party auditor. Franciscan stated that, under CMS's standards, medical reviewers are directed to extrapolate only in the event of a "sustained or high-level payment error, meaning 50 percent or more" (*Medicare Program Integrity Manual (MPIM)*, chapter 8, § 8.4.1.4). Franciscan stated that while these standards apply directly to Medicare review contractors (e.g., MACs and Recovery Audit Contractors), the standards should not be ignored in the context of an OIG audit recommending extrapolation. Franciscan also stated that because Medicare overpayments are at issue in this audit, the MAC that processes and demands any applicable overpayments at OIG's recommendation is subject to Federal law limiting the use of extrapolation to recover overpayments.

Franciscan requested that, at a minimum, we remove any recommendations related to extrapolation until the MAC has made a determination regarding repayment and Franciscan has had the opportunity to challenge that determination through the appeal process.

Office of Inspector General Response

The MPIM requirement cited by Franciscan (that a determination of a sustained or high level of payment error must be made before extrapolation) applies only to Medicare contractors, not OIG.²⁹ In addition, the statutory provisions upon which the MPIM guidelines are based do not prohibit CMS from accepting and acting upon our monetary recommendation.

Removing our recommendation related to extrapolation until the MAC has made a determination, as Franciscan requested, is not necessary. As stated in the footnote of our first recommendation, a provider does not need to return overpayments until after the second level of appeal. Potential overpayments identified in OIG reports that are based on extrapolation may be re-estimated depending on CMS determinations and the outcome of appeals.

RECOMMENDATIONS

Franciscan Comments

Franciscan had the following comments on our recommendations:

- Franciscan stated that given the foregoing, it disagreed with our first recommendation as written. However, Franciscan stated that it will refund the sampled claims it does not challenge.

²⁹ See the Act § 1893(f)(3); MPIM, Pub. No. 100-08, chapter 8, § 8.4.

- Franciscan stated that it agreed with our second recommendation in that exercising reasonable diligence to identify, report, and return overpayments in the audited sample is required by Federal law and regulations. Franciscan also stated that it will refund certain sampled claims and will evaluate and address any additional overpayments in accordance with the 60-day rule.
- Franciscan stated that in general, it disagreed with our third recommendation to the extent it suggests that Franciscan's policies and procedures did not ensure hospice services complied with Medicare requirements. Franciscan also stated that it reviews and, as appropriate, revises its policies and procedures as part of its compliance program; educates its employees on Medicare requirements and company policies; and re-educates appropriate personnel to ensure understanding of Medicare coverage standards.

Office of Inspector General Response

We clarified in the footnote to our first recommendation that OIG audit recommendations do not represent final determinations by Medicare. Action officials at CMS, acting through a MAC or other contractor, will determine whether a potential overpayment exists and will recoup any overpayments consistent with CMS's policies and procedures. If a disallowance is taken, a provider has the right to appeal the determination that a payment for a claim was improper (42 CFR § 405.904(a)(2)). An overpayment based on extrapolation is re-estimated depending on the result of the appeal.

We maintain that the improper payments occurred because Franciscan's policies and procedures were not effective in ensuring that the clinical documentation it maintained supported the terminal illness prognosis and the hospice services billed to Medicare.

APPENDIX A: AUDIT SCOPE AND METHODOLOGY

SCOPE

Our audit covered 21,537 hospice claims for which Franciscan received Medicare reimbursement totaling \$101,486,820 for services provided from January 1, 2016, through December 31, 2017 (audit period). These claims were extracted from CMS's National Claims History (NCH) file.

We did not assess Franciscan's overall internal control structure. Rather, we limited our review of internal controls to those applicable to our objective. Our audit enabled us to establish reasonable assurance of the authenticity and accuracy of the data obtained from the NCH file, but we did not assess the completeness of the file.

We performed fieldwork at Franciscan's office in University Place, Washington.

METHODOLOGY

To accomplish our objective, we:

- reviewed applicable Medicare laws, regulations, and guidance;
- met with CMS officials to gain an understanding of the Medicare hospice benefit;
- met with NGS officials to gain an understanding of the Medicare requirements related to hospice services;
- met with Franciscan officials to gain an understanding of Franciscan's policies and procedures related to providing and billing Medicare for hospice services and reviewed those policies and procedures;
- obtained from CMS's NCH file 23,459 hospice claims, totaling \$102,634,214,³⁰ for the audit period;
- excluded 1,888 claims, totaling \$953,338, that had a payment amount of less than \$1,000; 17 claims, totaling \$126,596, that were identified in the Recovery Audit Contractor data warehouse as having been reviewed by another party; and 17 claims, totaling \$67,460, that had compromised beneficiary numbers;
- created a sampling frame consisting of 21,537 hospice claims, totaling \$101,486,820;
- selected a simple random sample of 100 hospice claims from the sampling frame;

³⁰ We excluded claims that were zero-paid; however, an individual claim line can have a zero payment.

- reviewed data from CMS’s Common Working File and other available data for the sampled claims to determine whether the claims had been canceled or adjusted;
- obtained medical records for the 100 sampled claims and provided them to an independent medical review contractor, which determined whether the hospice services complied with Medicare requirements;
- reviewed the independent medical review contractor’s results and summarized the reason or reasons a claim was determined to be improperly reimbursed;
- used the results of the sample to estimate the amount of the improper Medicare payments made to Franciscan for hospice services; and
- discussed the results of our audit with Franciscan officials.

See Appendix C for our statistical sampling methodology and Appendix D for our sample results and estimates.

We conducted this performance audit in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives.

APPENDIX B: RELATED OFFICE OF INSPECTOR GENERAL REPORTS

APPENDIX C: STATISTICAL SAMPLING METHODOLOGY

SAMPLING FRAME

We obtained Medicare Part A claims data for hospice services that Franciscan provided during our audit period, representing 23,459 paid claims totaling \$102,634,214. We excluded 1,888 claims, totaling \$953,338, that had a payment amount of less than \$1,000; 17 claims, totaling \$126,596, that were identified in the Recovery Audit Contractor data warehouse as having been reviewed by another party; and 17 claims, totaling \$67,460, that had compromised beneficiary numbers. As a result, the sampling frame consisted of 21,537 claims totaling \$101,486,820. The data were extracted from the CMS NCH file.

SAMPLE UNIT

The sample unit was a Medicare Part A hospice claim.

SAMPLE DESIGN

We used a simple random sample.

SAMPLE SIZE

We selected a sample of 100 Medicare Part A hospice claims.

SOURCE OF THE RANDOM NUMBERS

We generated the random numbers with the OIG, Office of Audit Services (OAS), statistical software.

METHOD OF SELECTING SAMPLE ITEMS

We sorted the sampling frame by the FI_DOC_CLM_CNTL_NUM (a claim identification number) field, and we consecutively numbered the hospice claims in our sampling frame from 1 to 21,537. After generating 100 random numbers, we selected the corresponding frame items.

ESTIMATION METHODOLOGY

We used the OAS statistical software to calculate our estimates. We estimated the total amount of improper Medicare payments made to Franciscan for unallowable hospice services at the lower limit of the two-sided 90-percent confidence interval. Lower limits calculated in this manner are designed to be less than the actual overpayment total 95 percent of the time.

APPENDIX D: SAMPLE RESULTS AND ESTIMATES

Table 1: Sample Details and Results

Number of Claims in Sampling Frame	Value of Sampling Frame	Sample Size	Value of Sample	Number of Unallowable Claims	Value of Overpayments in Sample
21,537	\$101,486,820	100	\$468,212	21	\$93,785

**Table 2: Estimated Value of Overpayments in the Sampling Frame
(Limits Calculated for a 90-Percent Confidence Interval)**

Point estimate	\$20,198,445
Lower limit	13,027,841
Upper limit	27,369,050
